company

California schools are leasing sites to outside entities during non-school hours. Some districts are suing "the People" so the challenge is virtually unknown unless you read legal journals or find the published notice in a local community paper.

The ability to use the internet is key to the future of our children, their parents and the country.

There should be no restrictions on these sites and use encouraged, especially involving the whole family.

Funding should include rules that allow the use to the public.
